## SKILLS

Front-End Development
- Languages: HTML, CSS, JavaScript
- Frontend Library: React
- Styling Library: Tailwind CSS

I am skilled at problem-solving, adapt to new environment easily and manage time effectively.

## PROJECTS

**Movie Recommendation Website** [GitHub: https://github.com/Ankita-K-K/nextflix-gpt]

Built with ReactJS and it includes featuring functionalities like user login using firebase authentication service, movie browsing with various categories (Now Playing, Top Rated, Popular, Upcoming), movie recommendations using OpenAI's GPT-3 API, and video playback integration with YouTube trailers.

**YouTube-like Web Application** [GitHub: https://github.com/Ankita-K-K/YouTube]

Developed a YouTube-like web application using ReactJS and Redux. The application features video browsing, live chat functionality, and a comments section with nested replies. Additionally, the application includes a search bar with suggestions powered by the YouTube search API.

**Food-Recipe Website** [GitHub: https://github.com/Ankita-K-K/Food-Recipe]

Single-page React application for recipe search using the Forkify API. Includes a Search bar with user input for recipe names and has a feature of favorites system allowing users to store and manage preferred recipes.

## HOBBIES

Enthusiastic about singing, harmonium playing, and drawing.
